VALUE ADDED COURSE ON MANIFESTATION YOGA

Course Status : Regular

Duration : 40 Hours

Category : Manifestation Yoga

Level : Graduate

Start Date : 11th Oct, 2019

End Date : 30th Nov, 2019

Enrollment Ends : 30th Sep, 2019

Exam Date : 16th Dec, 2019

Objective - Aham Brahmasmi. This is the supreme truth that the entire creation is based on. As human beings, we are blessed with the highest form of sentience and we experience the universe deeply. However, we have forgotten the supreme truth entirely or we fail to realize it in our daily life. Praakatya Yog aims to raise the spiritual awareness of humans as well to give deep holistic insights to assist us in living a more fulfilled life driven by values instead of mere materialistic goals.

1. Big bang theory – A scientific analysis of the origin of the universe

Universe which was comparable to the size of a single bacterium in a billionth of a trillionth of a trillionth of a second expanded by a factor of 10 to the power 26 and became the size of the Milky way galaxy. Matter and energy are constantly converting into each other throughout the universe.

2. The Bible for manifestation – Understanding the teachings of the bible regarding the role of manifestation

The bible talks about gratitude and generosity as the key to prosperity for example, Gospel of St Matthew that goes like this - those who already have will get more and have plenty. But those who don't have even what little they have will be taken away. It may sound unfair, like rich get richer and poor get poorer. But there is a secret hidden in it.

The key to this mystery is gratitude.

3. Bhagwat Geeta – Learning the supreme truth as described in the Bhagwat Geeta
Lord Krishna shows his true form to Arjuna and explains how the entire universe is Him. He explains how the entire creation is the supreme truth itself

4. Manifestation – Meaning of the term

The word Manifest DOES NOT mean create. It does not mean borrow, buy or build. It means to make visible that, which already exists. The un-manifested is not non-existent, it is merely hidden, waiting to be uncovered.

5. Know Thyself - we are beings with an infinite consciousness.
Due to our limited sensory perception, we spend our entire lives believing ourselves to be beings of limited potential, confined into a small mortal body. This forgetfulness of our true reality has been spoken about by great mystic Yogis throughout the ages.
6. The forgotten truth - We have forgotten that we are "Prana".
The cosmic spiritual energy that manifests into all forms of matter and measurable energy. We are not human beings experiencing the Universe, we are the Universe experiencing human beings. In this forgotten truth lies our ability to realize our infinite potential to manifest anything. Consciousness is the guiding mechanism that the Universe uses to manifest a material reality from pure energy of infinite possibilities.
7. The price we pay - The forgetfulness of our true form costs us too much. We are bound to spend our entire lives under the belief that we are insignificant beings on a cosmic scale. We believe that we are born at one point in time, and then life events happen to us with very little control until we die. We take it for granted that there is a separation between us and the Universe, Time and Space.
8. The reality – what quantum physics tells about the universe
Through the Schrodinger and Heisenberg model of atom, it has been proven that the Quantum world goes in and out of existence constantly. 99.999 % of the time it is pure energy, materializing only for 0.001 % of the time. The nature of the sub atomic world can only be talked about in terms of "probability distributions". On the deepest scale, the Universe is all about probabilities, that are suspended. Infinite number of realities that stay suspended 99.999% of the time as pure energy, and only collapse into measurable solidity 0.001% of the time.
9. The universe - Hence the correct way to look at the Universe is to think of it as a Giant cosmic dance of infinite possibilities, enacted by Prana, taking the form of all matter and visible energy, and witnessed by Prana, taking the form of all conscious beings from the simplest bacterium to a complex Human Being.
10. Case studies –
 - Young's Double Slit Experiment and Quantum Entanglement.
 - Ancient Yogis have demonstrated superhuman abilities through control of Prana energy flow.
 - HeartMath Research Institute has proven that EEG waves of the heart have the potential to untangle DNA, through a controlled experiment.
 - Dr. Lebovici's prayer experiment has demonstrated the power of intentions with strong emotions in the form of prayer.
 - The intentions experiment by Lynne Mc Taggart

11. The purpose - The purpose of Manifestation Yoga
This false sense of separation deprives us of the sole purpose of life – to consciously experience the joy of the infinite by manifesting it into the finite. The purpose of Manifestation Yoga is to reach deep inside us and unveil that, which has been buried under the limitations of ignorance, cultural dogma and false conditioning.
12. Manifestation Yoga Meditation – an overview
Understanding the process and its basic structure
13. Grace – showing our gratitude to the universe for the opportunity to witness this beautiful creation
14. Attune – being one with the universe
15. Recharge – energize the body on a cellular level
16. Strengthen – make the body stronger for maintaining optimum posture
17. Heal – healing the body and blessing the chakras
18. Manifest – manifesting the most desirable experience of this life
19. Bonus chapter – Riddikulus

Course Description :-

In this course, students focus on understanding the demands of different styles of writing, and work to improve grammatical correctness, vocabulary development, revision and editing skills. This course includes material on vocabulary, tone, diction and editing, all in the areas of academic and business writing. Students will have the opportunity to write on a number of different topics and ideas, always centered on areas of interest to them. This course helps to develop the writing skills required in today's business world. Students learn techniques for writing effective emails, memos, proposals, and reports for a variety of audiences, becoming more accurate, clear and concise.

Learning Objectives - The purpose of academic writing is to inform, analyze, argue or evaluate a topic using evidence and logic. Academic writing presents and evaluates issues and arrives at an objective position: a position that focuses on and is informed by research and reasoning rather than personal feelings and opinions. The most common purpose in academic writing is to persuade, analyze, synthesize and inform. On the other hand, business writing is intended to inform, instruct, persuade or propose a solution using facts and benefits. The purpose of business writing is to communicate information clearly and effectively. It should be easy to understand and provide the reader with all the necessary information. Companies and firms can use business writing to convince customers to buy their products or services.

Course Description

Human values and environmental studies refer to the intersection of two important fields: ethics and environmental science. It is an interdisciplinary field that explores the ethical and moral dimensions of environmental issues and aims to promote sustainable and just relationships between humans and natural world. Environmental studies focus on understanding the physical, chemical, and biological components of the environment and how they interact with human society. It also seeks to understand the impact of human activities on the environment and to identify ways to mitigate negative effects. Human values, on the other hand, refer to the beliefs, principles, and attitudes that guide human behavior and decision making. They are an essential aspect of environmental studies because they shape the way individuals and societies interact with the environment.

Course Objectives and Outcomes- Human values are principles that guide individuals' behaviors and decisions, while environmental studies focus on understanding our natural world and its ecosystems. Recognizing the importance of exploring this relationship, we aim to shed light on how human values influence environmental outcomes and vice versa.
