PRAAKATYA YOG
(MANIFESTATION
YOGA)

Course Status : Regular
Duration : 40 Hours
Category : Manifestation Yoga
Level : Graduate
Start Date : 11-Oct, 2022
End Date : 30th Nov, 2022
Enrollment Ends : 30th Sep, 2022
Exam Date : 15th Dec, 2022

Objective - Aham Brahmasmi. This is the supreme truth that the entire creation is based on. As human beings, we are blessed with the highest form of sentience and we experience the universe deeply. However, we have forgotten the supreme truth entirely or we fail to realize it in our daily life. Praakatya Yog aims to raise the spiritual awareness of humans as well to give deep holistic insights to assist us in living a more fulfilled life driven by values instead of mere materialistic goals.

1. Big bang theory – A scientific analysis of the origin of the universe

Universe which was comparable to the size of a single bacterium in a billionth of a trillionth of a trillionth of a second expanded by a factor of 10 to the power 26 and became the size of the Milky way galaxy. Matter and energy are constantly converting into each other throughout the universe.

2. The Bible for manifestation – Understanding the teachings of the bible regarding the role of manifestation

The bible talks about gratitude and generosity as the key to prosperity for example, Gospel of St Matthew that goes like this - those who already have will get more and have plenty. But those who don't have even what little they have will be taken away. It may sound unfair, like rich get richer and poor get poorer. But there is a secret hidden in it.

The key to this mystery is gratitude.

3. Bhagwat Geeta – Learning the supreme truth as described in the Bhagwat Geeta
Lord Krishna shows his true form to Arjuna and explains how the entire universe is Him. He explains how the entire creation is the supreme truth itself

4. Manifestation – Meaning of the term

The word Manifest DOES NOT mean create. It does not mean borrow, buy or build. It means to make visible that, which already exists. The un-manifested ^{is not non-}existent, it is merely hidden, waiting to be uncovered.

5. Know Thyself - we are beings with an infinite consciousness.
Due to our limited sensory perception, we spend our entire lives believing ourselves to be beings of limited potential, confined into a small mortal body. This forgetfulness of our true reality has been spoken about by great mystic Yogis throughout the ages.
6. The forgotten truth - We have forgotten that we are "Prana".
The cosmic spiritual energy that manifests into all forms of matter and measurable energy. We are not human beings experiencing the Universe, we are the Universe experiencing human beings. In this forgotten truth lies our ability to realize our infinite potential to manifest anything. Consciousness is the guiding mechanism that the Universe uses to manifest a material reality from pure energy of infinite possibilities.
7. The price we pay - The forgetfulness of our true form costs us too much. We are bound to spend our entire lives under the belief that we are insignificant beings on a cosmic scale. We believe that we are born at one point in time, and then life events happen to us with very little control until we die. We take it for granted that there is a separation between us and the Universe, Time and Space.
8. The reality – what quantum physics tells about the universe
Through the Schrodinger and Heisenberg model of atom, it has been proven that the Quantum world goes in and out of existence constantly. 99.999 % of the time it is pure energy, materializing only for 0.001 % of the time. The nature of the sub atomic world can only be talked about in terms of "probability distributions". On the deepest scale, the Universe is all about probabilities, that are suspended. Infinite number of realities that stay suspended 99.999% of the time as pure energy, and only collapse into measurable solidity 0.001% of the time.
9. The universe - Hence the correct way to look at the Universe is to think of it as a Giant cosmic dance of infinite possibilities, enacted by Prana, taking the form of all matter and visible energy, and witnessed by Prana, taking the form of all conscious beings from the simplest bacterium to a complex Human Being.
10. Case studies –
 - Young's Double Slit Experiment and Quantum Entanglement.
 - Ancient Yogis have demonstrated superhuman abilities through control of Prana energy flow.
 - HeartMath Research Institute has proven that EEG waves of the heart have the potential to untangle DNA, through a controlled experiment.
 - Dr. Lebovici's prayer experiment has demonstrated the power of intentions with strong emotions in the form of prayer.
 - The intentions experiment by Lynne Mc Taggart.

11. The purpose - The purpose of Manifestation Yoga

This false sense of separation deprives us of the sole purpose of life – to consciously experience the joy of the infinite by manifesting it into the finite. The purpose of Manifestation Yoga is to reach deep inside us and unveil that, which has been buried under the limitations of ignorance, cultural dogma and false conditioning.

12. Manifestation Yoga Meditation – an overview

Understanding the process and its basic structure

13. Grace – showing our gratitude to the universe for the opportunity to witness this beautiful creation

14. Attune – being one with the universe

15. Recharge – energize the body on a cellular level

16. Strengthen – make the body stronger for maintaining optimum posture

17. Heal – healing the body and blessing the chakras

18. Manifest – manifesting the most desirable experience of this life

19. Bonus chapter – Riddikulus

Course Description-

In this course, students focus on understanding the demands of different styles of writing, and work to improve grammatical correctness, vocabulary development, revision and editing skills. This course includes material on vocabulary, tone, diction and editing, all in the areas of academic and business writing. Students will have the opportunity to write on a number of different topics and ideas, always centered on areas of interest to them. This course helps to develop the writing skills required in today's business world. Students learn techniques for writing effective emails, memos, proposals, and reports for a variety of audiences, becoming more accurate, clear and concise.

Learning Objectives- The purpose of academic writing is to inform, analyze, argue or evaluate a topic using evidence and logic. Academic writing presents and evaluates issues and arrives at an objective position: a position that focuses on and is informed by research and reasoning rather than personal feelings and opinions. The most common purpose in academic writing is to persuade, analyze, synthesize and inform. On the other hand, business writing is intended to inform, instruct, persuade or propose a solution using facts and benefits. The purpose of business writing is to communicate information clearly and effectively. It should be easy to understand and provide the reader with all the necessary information. Companies and firms can use business writing to convince customers to buy their products or services.

Add-on Course on Research Methodology and Soft Skills development

About the Add-on Course : In today's teaching and learning experience the emphasis is on innovative and original thinking which requires enabling students to harness their creativity and develop new perspectives and effective ways of presenting and communicating their ideas. With this aim and foresight, the Department of Law presents Add-on Course on Research Methodology and Soft Skills Development which will help students to develop communication competence and research know-how. It will not only introduce students to ethical study and application of the process of research which will in turn encourage critical thinking and problem solving abilities in students, necessary for achieving the highest standards of quality in scholarship but also additionally the emphasis on soft skills which includes the development of oral and written communication skills, shall focus on cultivating better and effective ways of and interpretation and presentation.

Description of course: This course introduces research methods as they apply to the higher education (HIED) field of study. HIED 695 provides a macro perspective of the methods associated with conducting scholarly research in all follow-on core, elective, quantitative and qualitative courses; and the doctoral dissertation.

Course Objective: To develop communication competence and research know how in prospective Lawyers so that they are able to communicate information as well as their thoughts and ideas with clarity and precision. This course will also equip them with the basic skills required for a variety of practical applications of communication such as applying for a job, writing reports and proposals.

Objectives For The Skills

What should a student who has completed the general education program be able to do in the way of writing, critical thinking, speaking, using information technology, quantitative analyzing, and researching?

The objective is to develop students' written expression of thought and provide learners opportunities to explore ideas and to build connections between content areas. This key skill focuses on developing your skills in Working with others and applying these skills in your studies, work or other activities over a period of time. To tackle all of this key skill you will need to plan your work over at least 3-4 months to give yourself enough time to practise and improve your skills, to seek feedback from others, and to monitor and evaluate your performance.

A main purpose of this key skill is to guide you through the management of a group activity culminating in a group presentation of the outcomes of the work. It involves you in actively contributing to the presentation of information.

You will need to identify opportunities for developing your skills in Working with others, for example, when:

Saraswati Vidya Mandir Law College
Shikarpur (Bulandshahr)**

- managing and presenting outcomes of a group project;
- contributing to community activities, such as organising a major event;
- investigating and implementing ways to improve work practice.

The overall objective is to ensure that students acquire a basic core of skills that are needed to research information with the use of information technology and critically evaluate that information. Information and computer literacy objectives for students completing the general education program are:

1. Determine the extent of information needed.
2. Utilize computers to create documents, and to retrieve and communicate needed information effectively and efficiently.
3. Evaluate information and its sources critically.
4. Incorporate selected information into one's knowledge base.
5. Use information effectively to accomplish a specific purpose.
6. Understand many of the ethical, legal, and social issues surrounding the use of information sources.

Course description

The course exposes students to key frameworks, tools and instruments used in the practice of development. During the course students will investigate various practical approaches and tools that are utilized in the planning, implementation and assessment of development projects (e.g. monitoring and evaluation, theory of change tools, stakeholder analysis, funding applications for development organisations, implementing projects in fragile states etc.). The course is applied in nature but students will gain skills to use, critically evaluate and assess methods, tools and techniques in relation to the dominant development discourse and trends. A statement of the group activity with a description of the context in which you are working, e.g. group project, team activity, and 2 or 3 outcomes with an explanation of why these are important to you. Make sure your outcomes are specific to help you identify when they have been achieved.

A list of reference sources including people who may be able to support you in developing your skills and completing the work. Check that sources are referenced correctly and accurately.

Course Description- A food and nutrition course is a learning process that will enable you with the skills required to research, process, and preserve the nutritional components in our food. The nutritional components are protein, carbohydrates, vitamins, fiber, minerals and fat. The scope in food and nutrition courses is broad. The course provides students with the learning of the importance of nutrition in our food. It teaches them the skills and knowledge to preserve the nutritious elements in our diet with an aim to having a healthy diet. The degree covers in depth learning about nutrients, vitamins, food science, malnutrition, obesity management and various other subjects. Nutritional Science has its roots in life sciences; it encompasses both biological and social sciences. Nutrition plays a major role in enhancing the quality of life through improved physical growth, immune-competence and enhancing productivity with improved health. Social, economic and cultural factors influence food consumption pattern and thus nutrition status of

the individual. Further, changes in nutrient composition during food processing and storage also needed to be studied. Thus our course offerings traverse the entire foods cape. The courses and learning experiences in the college are designed in such a way to provide both the biological and social science perspectives.

Course Objectives and Outcome- Students will be able to interpret and apply nutrition concepts to evaluate and improve the nutritional health of communities. Students will be able to integrate knowledge and skills in food and nutrition with professional issues affecting the nutrition and or dietetics fields. Food Nutrition Hygiene aims is to utilize knowledge from the physical and biological sciences as a basis for understanding the role of food and nutrients in health and disease processes. To provide nutrition counseling and education to individuals, groups, and communities throughout the life's pan using a variety of communication strategies. To impart in-depth knowledge in the area of Food, Nutrition and its relation to health. To understand human physiological process and importance of nutrients in metabolism. To train the students to be inquisitive and think in an innovative way.
