Course Description :-

In this course, students focus on understanding the demands of different styles of writing, and work to improve grammatical correctness, vocabulary development, revision and editing skills. This course includes material on vocabulary, tone, diction and editing, all in the areas of academic and business writing. Students will have the opportunity to write on a number of different topics and ideas, always centered on areas of interest to them. This course helps to develop the writing skills required in today's business world. Students learn techniques for writing effective emails, memos, proposals, and reports for a variety of audiences, becoming more accurate, clear and concise.

Learning Objectives - The purpose of academic writing is to inform, analyze, argue or evaluate a topic using evidence and logic. Academic writing presents and evaluates issues and arrives at an objective position: a position that focuses on and is informed by research and reasoning rather than personal feelings and opinions. The most common purpose in academic writing is to persuade, analyze, synthesize and inform. On the other hand, business writing is intended to inform, instruct, persuade or propose a solution using facts and benefits. The purpose of business writing is to communicate information clearly and effectively. It should be easy to understand and provide the reader with all the necessary information. Companies and firms can use business writing to convince customers to buy their products or services.
